Rules concerning Husbandry,

When you would Plant or Graft, consider where the wind bloweth, if it be in the South, it is very good for that purpose, but if it be North or East, it is not good.

It is good to Plant or graft generally the Moone increasing in these signes, *Taurus*, or *Aquarius* in the beginning of the Spring, or latter end of Harvest.

Plant trees for continuance, when the Moone is in *Taurus*, *Leo*, or *Aquarius*.

Cut timber to have it sound, in *December*, or *January*, in the wane of the Moone in *Aquarius* or *Pisces*.

Prune trees and pull off the moss in the moneth of *Febr*.

Plant hedges and Lop trees for fewell, that the heads may the sooner grow again, when the Moone is in *Aries*, or *Libra*, and in her increase.

Set young Quicksets, from *September* to *March*.

Remove young trees in the last quart. of the ☾, when she is in *V*, *♊*, *M*; and in these months *Septemb*, *Novem*, *Febr*.

Set Vines in *February*, *March* or *September*, specially the Moone in *Aries*, *Libra*, *Scorpio*, in her increase.

Set Rose trees in the midst of *February*, the ☾ increasing.

Cut or prune trees in *March* or *April*, the Moone in *Taurus*, *Virgo* or *Capricorne*.

Gather fruit, as Apples, Pears, and the like, at the full ☾, in the after-noon, the weather being faire and dry.

Cut down Hay presently after the full of the Moone.

Dug ground to prevent growing of weeds, the Moone decreasing.

Sow Carrot-seeds about the end of *February* or the beginning of *March*, the Moon increasing. Also, sow Onions and Leekes in *February* or *March*, at the wane of the Moone.

Sow Cucumbers and Melons in *February*, at the ☾ increasing, in a hot and faire day.

Sow Parsly, Fennel, and Anniseed, in *February* or *March* at the full of the Moone,

Fly, 1662.

Sow Marjerum, Violets, Time, Rosemary and Lavender, in February, March or April, in the increase of the moone.

Sow Gilliflowers and Wall-flowers in March or April, in the old of the moone.

Sow Hyssop and Savory in March when the moone is old.

Sow double Marigolds in February or March, in the increase of the moone.

Sheare Sheepe at the increase of the moone.

The best time to Geld cattel the Moone being in *Aries Sagittarius* or *Capricorne*.

Of Blood-letting, and some other Physicall Observations.

I Doubt les blood from the change to the first quarter, in middle age, from the first quarter to the full. In Elder years from the full to the last quarter. In old age, from the last quarter to the change.

But know, that under the age of 14. and above the age of 56. it is not good to bleed at all.

Againe, in the Catarrhical or Dog dayes, it is very hurtfull to leech, or Physick at all, unless there be great need, and indeed necessary hardly no lawd: Therefore in such a case, the disease being desperate, the cure must be adventured.

The purgation when the Moone is in *Erne*, or *Scorpio*, or *Sagittarius*, or *Capricorne*, or *Pisces*, and it will be sure to worke the better, because when a moyst Planet, in a moyst signe hath such an aspect, the humours in the body are then stirred up and down, and so the better purged out, therefore in this case, it cannot be advised to prepare humours by something that is sugary: and rather to be done, whilst the Moone is cleer in *Gemini*, *Libra*, or *Aquarius*.

Againe, a point that it may worke through, when the Moone is in *Aries*, or *Taurus*, or *Capricorne*: and know that the aspects of the Moone with *Saturne*, or *Mars*, or the Moone in *Leo*, ought to be observed in the taking of medicines.

Finally, it needeth urge no bad, these observations are expedient: for it is a plain truth, that the change of weather upon differing aspects, doth greatly change and alter mens bodies.
